

10th Southern New England Weather Conference

Saturday, October 24, 2009

Register now at

www.snewweatherconf.org

**Hosted by the National Weather Service
and the Blue Hill Meteorological Observatory**

**Held at the Clay Center Observatory
20 Newton Street, Brookline, MA**

Since 2000, the Southern New England Weather Conference has provided a place for weather enthusiasts and professionals to gather and share their knowledge and expertise. Subject areas will include winter weather forecasting, severe weather, hurricanes, advances in the science of meteorology, and emergency preparedness, as well as tools for teachers and numerous other topics.

SAMPLE OF 2009 SESSION TOPICS

Local studies on the Waterspouts of 2008, the Ice Storm of 2008, and the NH Tornado of July 24, 2008

**North Atlantic Hurricanes/Canadian Hurricane Centre
Ham Radio Operators at the National Hurricane Center**

How weather affects the Aviation Industry
