Tropical Weather Outlook
NWS National Hurricane Center Miami FL
200 AM EDT Tue Jun 1 2021

For the North Atlantic...Caribbean Sea and the Gulf of Mexico:

Tropical cyclone formation is not expected during the next 5 days.

Today marks the first day of the Atlantic hurricane season, which will run until November 30. Long-term averages for the number of named storms, hurricanes, and major hurricanes are 14, 7, and 3, respectively.

The list of names for 2021 is as follows:

Name	Pronunciation	Name	Pronunciation
Ana	AH-nah	Larry	LAIR-ree
Bill	bill	Mindy	MIN-dee
Claudette	klaw-DET	Nicholas	NIH-kuh-luss
Danny	DAN-ee	Odette	oh-DEHT
Elsa	EL-suh	Peter	PEE-tur
Fred	frehd	Rose	rohZ
Grace	grayss	Sam	sam
Henri	anh-REE	Teresa	tuh-REE-suh
Ida	EYE-duh	Victor	VIK-tur
Julian	JOO-lee-uhn	Wanda	WAHN-duh
Kate	kayt		

One tropical storm, Ana, already formed this year in May. The next named storm that develops this season will be Bill.

This product, the Tropical Weather Outlook, briefly describes significant areas of disturbed weather and their potential for tropical cyclone formation during the next five days. The issuance times of this product are 2 AM, 8 AM, 2 PM, and 8 PM EDT. After the change to standard time in November, the issuance times are 1 AM, 7 AM, 1 PM, and 7 PM EST.

A Special Tropical Weather Outlook will be issued to provide updates, as necessary, in between the regularly scheduled issuances of the Tropical Weather Outlook. Special Tropical Weather Outlooks will be issued under the same WMO and AWIPS headers as the regular Tropical Weather Outlooks.

A standard package of products, consisting of the tropical cyclone public advisory, the forecast/advisory, the cyclone discussion,

and a wind speed probability product, is issued every six hours for all ongoing tropical cyclones. In addition, a special advisory package may be issued at any time to advise of significant unexpected changes or to modify watches or warnings.

The Tropical Cyclone Update is a brief statement to inform of significant changes in a tropical cyclone or to post or cancel watches or warnings. It is used in lieu of or to precede the issuance of a special advisory package. Tropical Cyclone Updates, which can be issued at any time, can be found under WMO header WTNT61-65 KNHC, and under AWIPS header MIATCUAT1-5.
